Sir:

In response to the Office Action dated January 30, 2002, extended to May 30, 2002 by a one (1) month Petition for Extension of Time, please amend the above-identified application as follows:

IN THE CLAIMS:

Amend claims 1 and 2 as follows:

B¹
1. (Amended) An engine control system for a hybrid vehicle having an internal combustion engine and an electric motor as driving force sources, for permitting stopping and starting of said engine in accordance with predetermined drive conditions, comprising:

battery remaining charge computing means for computing battery remaining charge of the electric motor;

brake booster for receiving negative pressure supplied by an operation of said engine;

pressure detector for detecting a pressure supplied to said brake booster;

throttle-opening-state detector for detecting a throttle opening state; and
